

ECONYL® Bespoke

2025 edition

Luxury from the inside out.

ECONYL® Bespoke offers rich nylon yarns tailored for luxurious, exquisitely crafted carpets and rugs – with a lower footprint. Designed to meet the highest standards and performance demands of contract, hospitality, and residential spaces.

ECONYL® regenerated nylon unlocks endless opportunities for design excellence and responsible consumption:

- 100% made from waste, 100% recyclable, and infinitely regenerable
- Same performance and design flexibility as standard nylon with a lower impact
- For every 10,000 tons of ECONYL® raw material, 70,000 barrels of crude oil are saved

APPLICATIONS

- Handmade & machine-made rugs
- Tufted & woven rugs
- Residential and commercial wall-to-wall carpets

ECONYL® Bespoke Offerings

A tailored product portfolio offering a rich variety of textures and finishes inspired by natural materials available in both solution-dyed and dyed ECONYL® regenerated nylon. Stock available in India.

INSPIRED BY NATURE, REIMAGINED

ECONYL® ReLana

Recall the classic and timeless appeal of wool

2-ply dyed twist nylon yarn

ECONYL® ReSeta

Recall the softness and lustre of silk

2-ply dyed twist nylon in bright and dull finishes with vibrant stock colors. Custom colors available with MOQ and lead time.

ECONYL® Terra

A sustainable and durable alternative to natural raw fiber

High-count air-entangled solution-dyed nylon with a unique collection of colors in stock.

Whether you're crafting inviting hotel spaces, high-traffic commercial environments, or luxurious homes, ECONYL® Bespoke provides the design flexibility and performance you need to create one-of-a-kind flooring solutions.

Long-lasting Luxury

- Maximum texture & appearance retention
- Resistant to crushing and matting
- Intrinsic moth resistance

Stain Resistance

- Maximum soil release & minimal stain absorption
- Easy to clean and maintain

**Results based on tests following ISO 13750 and AATCC TM-175*

Superior Colors

- Superior colorfastness against light, bleach, peroxides, and other chemicals
- Excellent Lightfastness

**Results based on tests following ISO 105-B02:2014*

Design Flexibility

- Efficiency in tufting & weaving
- Suitable for handmade and machine-made carpets & rugs
- Excellent dyeing capabilities

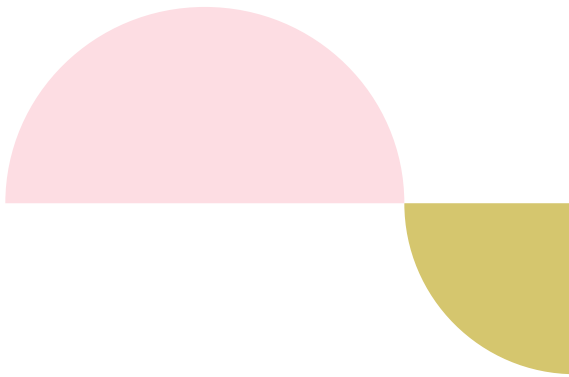

Premier Service

- Stock available in India, cutting down lead time
- Local dyeing facilities & expert guidance
- Local commercial and technical support available

Regenerated nylon reshaping the future of Bespoke Collections

Creativity is endless, our planet's resources are not. ECONYL® nylon unlocks creativity without ever having to use new resources.

Design with Care

- Made from 100% pre- and post-consumer nylon waste
- Unique proprietary technology chemically regenerates nylon waste into ECONYL® nylon
- Same performance and quality as standard nylon with a lower environmental impact
- 100% recycled and infinitely regenerable

Certifications

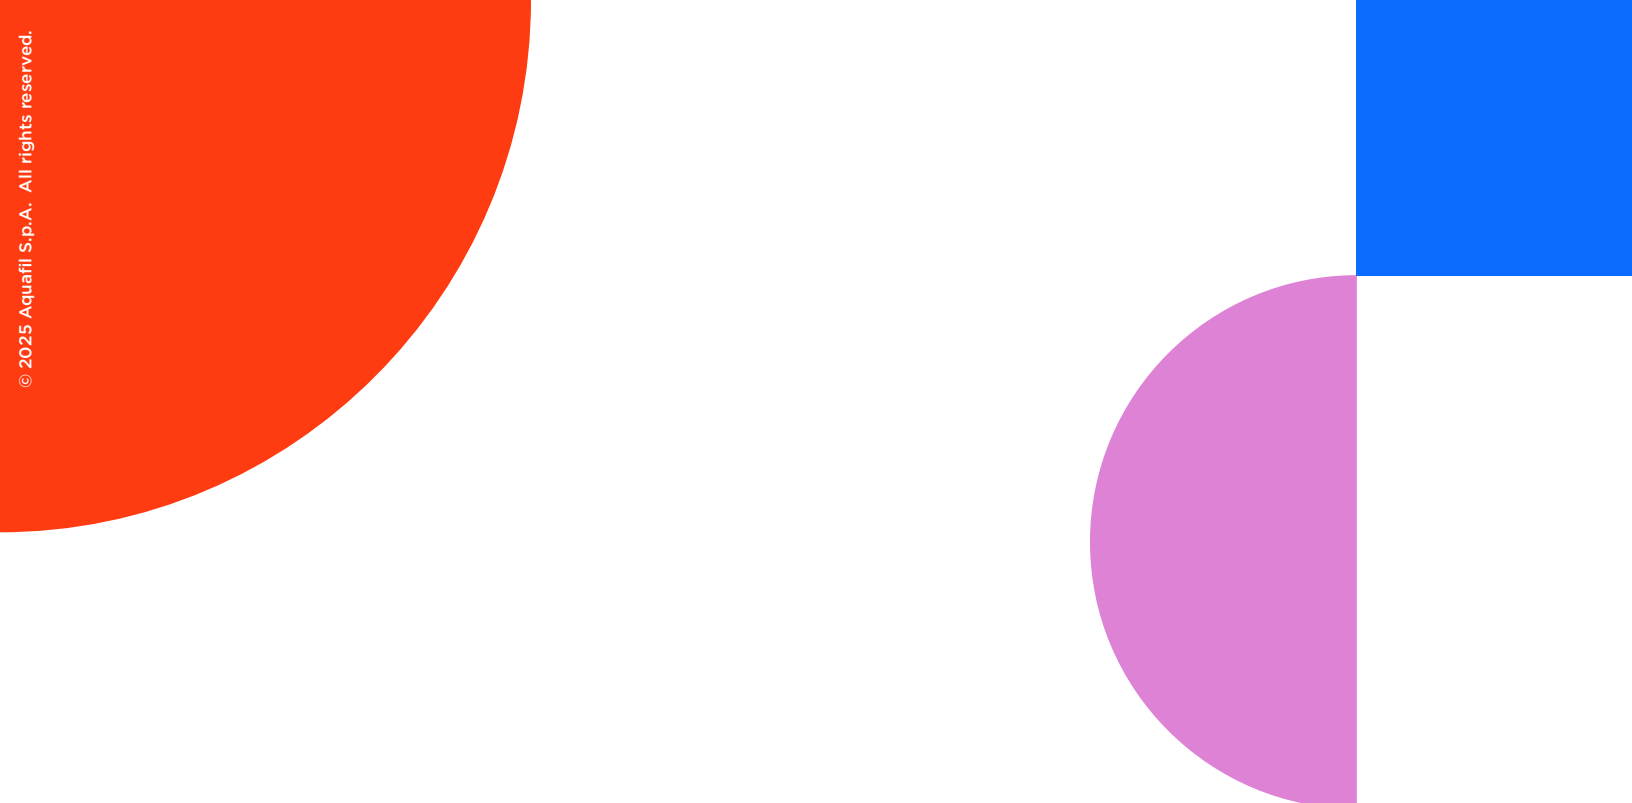

- Low global warming potential
- OekoTex® & C2C®
- Contributes to LEED v4, BREEAM, & WELL

Eco-Design

Eco-design starts with the end in mind. The ingredients and construction of a rug matter. By specifying responsible ingredients and designing for disassembly, we can design out waste and regenerate valuable materials, again and again.

Authenticity

The authenticity of ECONYL® fibers can be guaranteed through a verification test. This is an effort to protect against counterfeits and provide partners and consumers confidence in the authenticity of ECONYL® nylon in the rugs and carpets they purchase.
